# XL REEFER

[www.containerid.be](http://www.containerid.be)

## XL Refers by Container ID

With years of experience in the reefer industry we focus on continuously develop and adapt products to our clients' needs. Besides regular reefers Container ID also offers XL Reefers installations and Insulated boxes.

By assembling reefers we enable our clients to achieve larger cold storage space, whilst remaining 100% modular and mobile.

We offer tailor made assemblies that match your requirements with an infinite amount of options and features.

### In brief

- New or used reefers are combined to achieve larger cold space.
- Temperatures of +40 °C to -40°C can be maintained.
- Completely custom made. We can built any set up or arrangement you desire.
- Delivery and installation on site. Also plug and play options.
- Warranty on new units.
- Quick and timely delivery (Besides cold rooms we can also build Insulated rooms)

Infinite possibilities

Different temperatures in attached rooms

Modular and mobile

Built and delivered on site

### Multi-temperature cold storage

We can compartmentalize your cold space with a conventional entrance or built in cold rooms to maintain efficient temperature switch between spaces. The different volumes obtained will enable you to store products at different preservation temperatures. By using different cold units, you can manage the temperature and humidity of each cold storage area independently of the others.

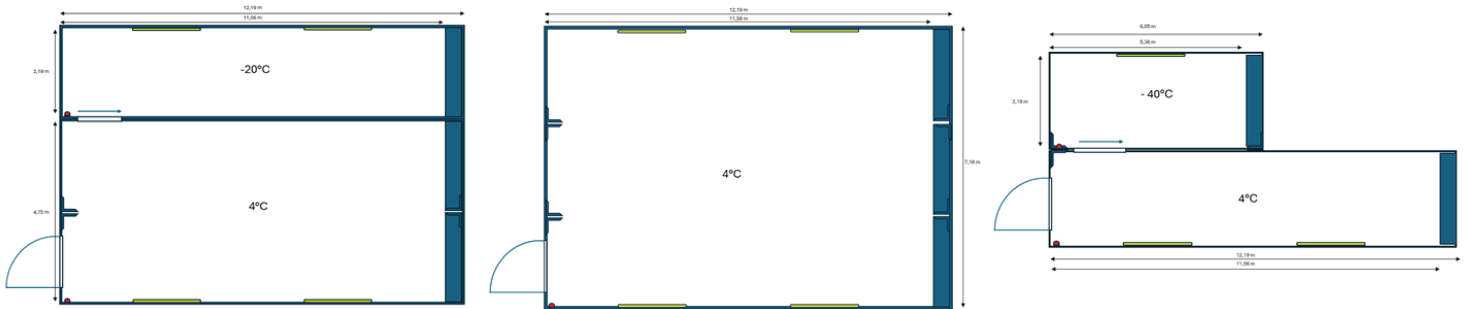

### Assembling your XL Reefer

Do you need more than 150m<sup>2</sup> of cold storage? Our technicians will come to your site at the time of delivery to assemble the refrigeration modules directly on site to create your XL reefer. Or opt for the plug and play version where you can assemble your reefers with minimal effort.

# Why better than cold rooms?

Compared to regular cold rooms our XL reefers enable you to be flexible and mobile at a competitive price. Once placed the XL reefer can be moved at any time as well as expanded by adding new units. Further, the installation is simply placed on mobile foundation and thus does not have to be permanently fixed on your site. The XL reefer allows you to keep your goods stored cold at a more competitive price and installed in no time.
